

GAURAV JAIN

SENIOR TECHNICAL PRODUCT MANAGER

Mumbai, Maharashtra, India | +91 8097463214 | jigerjain4.gj@gmail.com
[linkedin.com/in/extretessestric](https://www.linkedin.com/in/extretessestric) | extretessestric.github.io

PROFESSIONAL SUMMARY

Technical Product Manager with 10+ years of experience connecting customer needs, business goals, and engineering execution across SaaS, AI, payments, commerce, education, and enterprise platforms. Experienced in requirements discovery, feature definition, prioritization, delivery planning, stakeholder alignment, adoption, product support, and KPI tracking. Brings sufficient technical depth to guide API, cloud, data, mobile, integration, and platform decisions without losing focus on user and business outcomes.

CORE EXPERTISE

Product Leadership: Customer and stakeholder discovery; requirements definition; feature prioritization; release planning; lifecycle ownership

Outcome Management: Product KPIs; adoption and engagement; customer satisfaction; process optimization; support and change-request governance

Technical Product Scope: SaaS platforms; APIs and integrations; AI-enabled workflows; payments; cloud; web and mobile products; data products

PROFESSIONAL EXPERIENCE

Technoark Solutions | Mumbai, India | Jan 2016 - Present

Senior Technical Product Manager / Technology Delivery Lead

- Translated customer needs and business objectives into clear requirements, delivery priorities, and coordinated execution across product, engineering, and stakeholder groups.
- Managed products and change requests from discovery through release and support, balancing business value, user experience, technical feasibility, and delivery risk.
- Improved customer satisfaction by 15% through stronger client liaison, product-support responsiveness, requirement clarity, and process optimization.
- Increased user engagement by 30% through strategic technology initiatives, cross-functional coordination, and outcome-focused delivery decisions.
- Led payment-experience improvements across Razorpay and Stripe, increasing transaction success by 18% and reducing failures by 25% through retry logic.
- Introduced LLM-enabled automation and predictive capabilities that reduced manual workload by 30-40% in targeted business processes.
- Tracked product and delivery KPIs, communicated trade-offs, and supported executive decisions through structured reporting and presentations.
- Worked with Indian, US, and government stakeholders to gather requirements, align expectations, coordinate launches, and manage evolving product needs.

PRODUCT PORTFOLIO

LeXi AI - Legal-intelligence platform with contract-lifecycle and litigation-preparation modules, combining structured legal workflows with LLM and NLP capabilities. *Technology context: React, Python, FastAPI, LLM, NLP, MongoDB.*

ArealYou.ai - AI-enabled personal-care product using video analysis to assess hair and scalp attributes and generate individualized care insights. *Technology context: React, Python, Django, OpenCV, MySQL, AWS.*

Paper.id - FinTech SaaS platform for SME invoicing, receivables, payables, reconciliation, reminders, supplier workflows, and collections across 30+ payment methods. *Technology context: Angular, Go, Google Cloud, Vertex AI, analytics and marketing integrations.*
