

# GAURAV JAIN

CTO CUM SR. TECHNICAL  
PROJECT / PRODUCT /  
PROGRAM MANAGER

## WORK EXPERIENCE

### Technoark Solutions

Mumbai, Maharashtra, India

Jan 2016 - Present

- Managed project budgets, conducted cost analysis, and led financial risk assessments, ensuring alignment with strategic goals.
- **Spearheaded SAP implementations**, including configuration, customization, and end-user training, enhancing business efficiency.
- **Delivered development milestones 20% faster** by gathering and defining clear customer requirements and coordinating execution.
- **Improved customer satisfaction by 15%** through effective client liaison, process optimization, and managing product support and change requests to align with business goals.
- Led and mentored cross-functional teams, **boosting user engagement by 30%** with strategic technology initiatives.
- Ensured **data security compliance** and supported the executive team with strategic planning, reports, and presentations.
- Facilitated communication across departments and managed crises with contingency planning.
- Monitored **strategic initiatives, tracked KPIs, and ensured accountability** in execution.
- Coordinated successful project execution with **government entities**, aligning with regulations and timelines.
- Drafted **technical proposals for government bids**, ensuring compliance with guidelines.
- Managed project progress, conducted weekly status meetings, and resolved issues with **risk mitigation strategies**.
- Managed end-to-end delivery of diverse scale projects and products, ensuring timely execution across domains using **Agile, Scrum, and Waterfall methodologies**.
- Collaborated with **US-based and internal clients for 10+ years**, driving stakeholder alignment, requirement gathering, and seamless project execution.
- Led integration of multi-gateway payment system (Razorpay + Stripe), **improving transaction success rate by 18% and reducing failures by 25%** through intelligent retry logic.
- **Led end-to-end AI/ML adoption** by deploying LLM-powered automation and predictive models using OpenAI/Gemini, **reducing manual workload by 30-40% and enabling scalable, data-driven decision-making across the organization.**

## SUMMARY

Seasoned Senior Technical Product / Project / Program Manager with 10+ years of expertise in leading large-scale IT implementations. Proven ability to bridge business and technical domains, ensuring timely, budget-conscious, and specification-aligned project completions. Adept at merging user needs with business goals to deliver impactful solutions. Skilled in leveraging Agile, Scrum, and Waterfall methodologies across diverse industries such as AgriTech, AtmosTech, RealTech, HealthTech, FinTech, EdTech, etc.
